PROJECTS

|| MechsMeet – Deployed Site | GitHub Repository
- – A mobile-first app that connects local mechanics and people in need of their services. Allows users to create a customizable account as a mechanic or search for and pay mechanics for their services as a guest utilizing the Stripe API.

|| Make My Day - Deployed Site | GitHub Repository
- – Local event searching app that can find the user a wide range of social and sporting events in a city of their choice utilizing the SeatGeek API.

|| Book Search Engine - Deployed Site | GitHub Repository
- – This project allows a user to search for and save specific books from and to a database based on input they put into a search bar.
